Snowman Activity

STEP BY STEP INSTRUCTIONS

1. Download the pdf of the snowman template.
2. Print out the template.
3. Cut out the three circles to make the snowman.
4. Using the three circles you just cut out, trace each circle onto a piece of construction paper, any color you like, you can even use three different colors of construction paper.
5. Now that you've traced the three circles onto your construction paper, cut out those circles.
6. Next, you have two choices!
 - Using tape or a glue stick, tape or glue the three body parts onto another piece of paper.
 - Or, tape the three circles to each other without putting them on a piece of paper and make the snowman free standing without being attached to another piece of paper. It's your snowman, so have fun with it!
9. Let your creativity kick into gear! Decorate your snowman any way you like! You can decorate it with stickers, magic markers, colored pencils, crayons, felt pens! Just use your imagination.
11. Give it eyes, a nose, a mouth, a belly button, anything else you like. Maybe even hair! Or lipstick, or a mustache!
12. Take a step back, look at what you've created, and pat yourself on the back. You made a great, imaginative snowman of your very own!
